

# Schnelles Addieren bis 1.000.000

Das kann ich schon!

Name: \_\_\_\_\_

Datum: \_\_\_\_\_

## 1) Rechne.

$20.000 + 80.000 = \underline{\hspace{2cm}}$

$50.000 + 50.000 = \underline{\hspace{2cm}}$

$10.000 + 90.000 = \underline{\hspace{2cm}}$

$300.000 + 700.000 = \underline{\hspace{2cm}}$

$600.000 + 400.000 = \underline{\hspace{2cm}}$

$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

## 2) Rechne.

$35.000 + \underline{\hspace{2cm}} = 100.000$

$96.000 + \underline{\hspace{2cm}} = 100.000$

$72.000 + \underline{\hspace{2cm}} = 200.000$

$355.000 + \underline{\hspace{2cm}} = 400.000$

$840.000 + \underline{\hspace{2cm}} = 1.000.000$

$998.000 + \underline{\hspace{2cm}} = 1.000.000$

## 3) Rechne.

$39.000 + 1.000 = \underline{\hspace{2cm}}$

$57.000 + 2.500 = \underline{\hspace{2cm}}$

$50.000 + 25.000 = \underline{\hspace{2cm}}$

$85.000 + 7.000 = \underline{\hspace{2cm}}$

$949.000 + 1.000 = \underline{\hspace{2cm}}$

$800.000 + 20.000 = \underline{\hspace{2cm}}$

$110.000 + 300.000 = \underline{\hspace{2cm}}$

$700.000 + 10.000 = \underline{\hspace{2cm}}$

## 4) Zähle vorwärts.

In 5.000er Schritten 65.000, 70.000, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_

In 50.000er Schritten 250.000, 300.000, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_

In 100.000er Schritten 300.000, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_

## 5) Verdopple.

Zahl	500.000	250.000	34.000	16.000	480.000
Das Doppelte	1.000.000
