

## Aufgabenkarten Addition ZR 20 mit Rückseite

Dieses Material eignet sich für die folgenden Übungen der FÖDIMA-Kartei:

- Zwanzigerfeld – Addition, Nr. 21
- Einfache Aufgaben – Addition, Nr. 23
- Einfache Aufgaben rechnen – Addition, Nr. 24
- Ableitungsstrategien nutzen – Addition, Nr. 25

Anhand der Lupen auf der Rückseite der Aufgabenkarten können die Bezüge zu den Kernaufgaben der Addition hergestellt werden.

Die leeren Karten können zum Erstellen von eigenen Aufgabenkarten genutzt werden.

Die Aufgabenkarten sind nach den Kernaufgabentypen sortiert und entsprechend in Abschnitte eingeteilt.

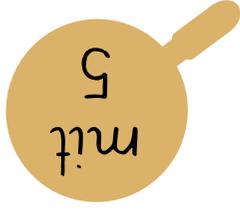

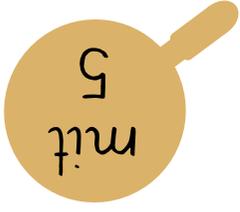

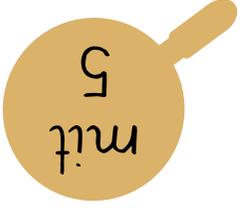

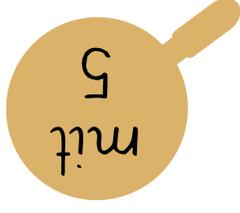

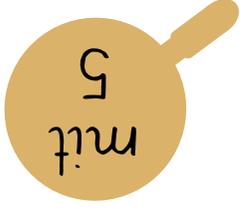

Zusätzlich wurden Aufgabenkarten ausgewählter Additionsaufgaben erstellt, die keiner Strategie zugeordnet werden können. Diese sind an den leeren Lupen auf der Rückseite erkennbar.

Druckhinweis: Die Aufgabenkarten mit Rückseite werden doppelseitig über die lange Seite gedruckt.
